Bid Date: 10-15-2018

**Project Description:** The following bid consists of installing new metal roofing on the building located at the above mentioned property address. First, we will attach double bubble across the entire roof. This will provide a reflective layer of insulation; to decrease the amount of condensation—which leads to rust—on the bottom of the steel roofing. Next we will attach 1x4 firing strips, every 2 feet, up the entire roof. This will give us a firm surface to attach the steel to. We will then screw\* in the painted, steel roofing in the color of your choosing. The paint on the steel comes with a 40 year warranty. (\*We will use 2" Lifetime screws in the color that matches your roof selection. They come with a protective cap that covers the screw-head and washer to decrease the deterioration of the rubber washer.) Lastly, we will install seam tape on all seams to provide a seal between each piece of steel.

This price is set for 30 days, after that it may be adjusted depending on increased material costs. The price includes all material and installation labor.

Downpayment of \$8574 due before we will schedule the project.  
Remaining \$5710 is due when the job is completed as described above.
