

CSinPA K-8 Pathway

Central Intermediate Unit 10

Expand computer science (CS) learning at your school

A 100% virtual professional learning experience, the Pathway is designed to support K-8 educators to grow their CS capacity.

Provided at no cost. Act 48 credit available.

No CS experience needed

The Pathway is open to any K-8 educator involved with computer science instruction, including:

- grade-level teachers
- content area teachers
- special education teachers
- English language teachers
- librarians
- specialists
- instructional coaches

While not required, it is recommended that schools engage with a team of 2+ educators to allow for collaboration throughout the Pathway.

Learn. Teach. Advocate.

Participants engage as learners, teachers, and CS champions (advocates) as they develop and implement a small-scale pilot project to expand CS access for students.

Participants will:

1. Access and use the K-12 CS Framework and CSTA standards
2. Initiate and reflect on a small-scale implementation pilot
3. Recognize and create a plan to close equity gaps in CS education, specifically for students with disabilities and other historically underrepresented populations, such as students of color and female students
4. Leverage community and stakeholder partnerships
5. Articulate the need for CS in education and our communities

**COHORT BEGINS FEBRUARY 1, 2021.
